August 2020

Dear School Families,

This year our school has a student who is at high risk for developing a severe allergic reaction to latex. It is our goal to provide a safe learning environment for **all** of our students and to decrease the possibility of exposure to latex for this student. With this concern in mind, we are asking for your assistance to obtain our goal.

The School Principal and the School Nurses ask that families would not send items in to school that typically contain latex. Latex is found in many common items. Some examples are balloons, Koosh balls, tennis balls and rubber balls and toys.

*Avoidance of the allergen is **key** to preventing life-threatening reactions for this student.*

It takes a whole community to look after all of our children. We appreciate your understanding and assistance in keeping Pine Street Elementary School a safe school for all.

As always, please call if you should have any questions or concerns.

Thank you,

Loretta Clark
School Principal

Lisa McKenna, MSN, RN, NCSN
Health Services Director
